Desiccators

Cleanroom Storage & Handling

NitroPlex™ Humidity Control System
Configured for multiplexed RH control and datalogging
of a 20-chamber desiccator – Ref. No. 110327.

Shown with optional SmartPlex™ hand-held computer
and software.

NitroPlex™ — Zero Tolerance Moisture Control

Terra's NitroPlex™ Desiccator Control System optimizes nitrogen purge efficiency for the most demanding applications, when every second of moisture exposure counts.

The NitroPlex™ is the only humidity control system that combines the monitoring and control capabilities required in zero-tolerance applications with miniaturized semiconductor components, bio/pharmaceutical samples and other moisture-sensitive materials.

Chamber-by-Chamber Multiplexed %RH Monitor/Control

A separate high-accuracy, miniaturized humidity module in each desiccator chamber provides independent monitor/control capability. Each module can be programmed locally or remotely to maintain a humidity set point from ambient down to 0%RH.

Nitrogen is directed only where needed to keep the %RH level below the critical set point.

Cuts System Recovery Time to Seconds

Desiccators controlled by a flowmeter may require an hour or more to regain a humidity set point after a chamber access door is opened. When doors are opened repeatedly, humidity levels can remain above the critical set point for an entire work day.

Testing shows that the NitroPlex™ cuts this recovery time by over 400% in a 4-chamber desiccator (see sidebar below). In Terra's Microccator™ this recovery time is cut to a matter of seconds, eliminating moisture-caused damage (see photo on facing page).

Product Safety Alarm

The NitroPlex™ eliminates another common cause of moisture exposure: access doors mistakenly left open or ajar. The system directs a high-flow nitrogen purge to any chamber the moment its door is opened. If the door remains opened longer than a specified delay time, the NitroPlex™ issues warning alarms to alert personnel to the problem.

Recovery Time Comparison — The NitroPlex™ Advantage

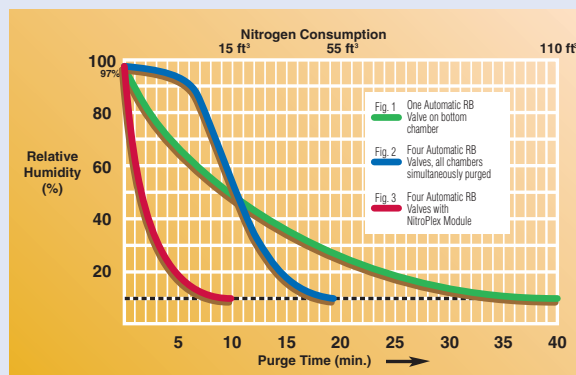

Almost any desiccator maintains a low-RH storage environment under ideal conditions. Problems begin when someone opens a door.

Immediately, moisture-laden air backfills the cabinet. The measure of an efficient humidity control system is how quickly the cabinet can remove moisture and recover the initial humidity set point.

In a large desiccator with a flowmeter and a single bleed valve, this recovery can take up to an hour. If, during this recovery period, another door is opened, the process begins again. Moisture may remain present in the storage enclosure during the entire duration of a working shift — negating your investment in desiccator storage and slashing your product yields.

Terra's Dual Purge™ and NitroWatch™ systems improve system recovery time by initiating a high-flow purge when a door opens or humidity creeps above a set point threshold. This variable purging speeds up moisture removal, but recovery can still take up to 40 minutes if only one bleed valve is present (see Figure 1).

Simply by installing Terra's Automatic RB™ (Relief/Bleed) Valve in each chamber, you can cut both the system recovery time and the nitrogen consumption in half (see Figure 2). This configuration minimizes moisture migration — water vapor is purged out of the chamber it enters.

Nitrogen Consumption Recovery Time

Fig. 1: 110 ft³
Fig. 2: 55 ft³ (100% improvement)
Fig. 3: 15 ft³ (nearly 300% improvement)

Fig. 1: 40 minutes
Fig. 2: 20 minutes (100% improvement)
Fig. 3: 10 minutes (400% improvement)

For optimal efficiency, however, a desiccator requires chamber-by-chamber humidity sensing and purge control. Only Terra's NitroPlex™ system delivers this purge efficiency (see Figure 3). A NitroPlex™ desiccator typically saves up to 77% in nitrogen cost. More importantly, it cuts system recovery time by 400%, ensuring dry storage under real-world operating conditions.

Datalogging – Complete Product Assurance

The NitroPlex™ control system includes capabilities for logging data to a remote PC for subsequent analysis.

A serial port downloads data to a remote PC for display and analysis. For optimal convenience, Terra offers the SmartPlex™: a hand-held computer with software customized to your NitroPlex™ cabinet and application requirements. The SmartPlex™ allows convenient remote programming of chamber set points. It also provides a graphical display of current humidity and set point conditions in each NitroPlex™ chamber and records these data for archiving or analysis.

This datalogging capability provides a detailed, traceable storage and access history for every chamber of a NitroPlex™ desiccator—an invaluable tool in R&D experiments.

SmartPlex™ option datalogs access history and environmental conditions for analysis or printing at a remote PC

Humidity Uniformity

In a large, multi-chamber cabinet with only one humidity sensor, the %RH level can vary as much as 50% from one chamber to another. Because humidity levels in portions of the cabinet remain well above the set point level, moisture can degrade parts before you even realize there's a problem! By sensing humidity levels in each chamber independently, the NitroPlex™ provides complete RH uniformity to eliminate this problem.

Multiplexed Control for Moisture Exposure Studies

Multiplexed humidity monitoring and control also allows a different humidity set point in each desiccator chamber.

This flexibility has several important application benefits. It allows a single cabinet to store parts with varying moisture sensitivities. It also allows accelerated life testing under varying humidity levels for everything from pharmaceuticals to semiconductor ICs. You can even monitor the effects of varying humidity levels on cosmetics and other moisture-sensitive chemical compounds.

Application Versatility

Add the NitroPlex™ to any Terra desiccator cabinet to create a state-of-the-art automated humidity control system. Or customize a NitroPlex™ cabinet to the unique demands of your application.

What's Your Application?

The standard NitroPlex™ system provides unsurpassed moisture control in dozens of storage applications. Temperature, gas or biological sensors expand the range of critical operations.

- **Microelectronics components, SMDs, hybrid packages**
- **Storage of PCBs for rework**
- **Pharmaceutical R&D studies**
- **Kitting of high-precision watch components**
- **Pass-through transfer of night-vision electronics**
- **Lithium battery development**
- **Humidity testing of cosmetics**
- **Accelerated life testing of ICs**
- **Animal inhalation and toxicology research**

Terra's Desiccator Cleanliness

Terra desiccators feature non-particulating, easy-clean, cleanroom-compatible materials to ensure a non-contaminating environment for sensitive materials.

Particle deposition testing reveals minimal detectable contamination of test wafers stored inside a Terra desiccator — an average of much less than one particle @ 0.16 micron over a 12-hour period, which lies within the typical deviation of the test equipment.

Overnight Particle Deposition Rate (12-hour test period)

Single Cassette/Chamber*						Multiple Test Cassettes**					
Chamber	1 (top)	2	3	5 (bottom)	Total	Cassette No.	1	2	3	4	Total
@ 0.16µm particles	0.20	-0.40	0.24	0.28	0.08	@ 0.16 µm particles	0.52	0.60	1.20	0.80	0.78
@ 0.20µm particles	0.24	0.24	-0.24	0.40	0.16	@ 0.20 µm particles	0.48	0.44	0.92	0.36	0.55

Performed in 5-chamber Wafer Box Desiccator No. 9130-21A equipped with NitroWatch and Dual Purge systems, using Tencor 6220 particle scanner. Results indicate average difference between measured particle counts before and after the test period, during which time filtered nitrogen was purged through the cabinet to maintain a 15% RH.

* Single Cassette Test: one test wafer cassette installed in each of four chambers.

** Multiple Cassette Test: Each of four test wafer cassettes installed inside chamber 5 (bottom chamber).

Dissipative PVC SmartDesiccator™

No. 1911-26B (shelves optional)

Seconds to install and program!

304 Stainless Steel SmartDesiccator™
22"W x 20.75"D x 16.625"H
Cat. # 1911-02A \$/Each **2,507.00**

SmartDesiccator™ Benchtop Storage System

- Automates dry benchtop storage to eliminate moisture-related degradation and optimize yields
- First-of-its-kind gas control system conserves nitrogen
- Fully integrated turnkey system takes 30 seconds to install

Terra Universal's SmartDesiccator™ maximizes yields of sensitive materials by automatically maintaining a user-determined humidity set point.

Its quick-response feedback system continuously monitors the cabinet's relative humidity level and activates a purge of dry nitrogen only when needed. The system thus economizes on gas consumption and minimizes the possibility of overpressures that can stress cabinet seals. Comparison testing reveals that the SmartDesiccator™ maintains a low relative humidity level using only 22% of the nitrogen required by a flowmeter-based system of the identical size (see below).

Stainless steel doors (optional on plastic cabinets) restrict the door from flexing or bending, thereby preventing the cracks and fatigue that occur in all-plastic cabinets. A specially designed lift latch eliminates hinge and door damage caused by the strain of twisting and turning conventional latch systems. The SmartDesiccator™ also incorporates a one-piece, nonadhesive, nonoutgassing gasket specially formulated to retain sealing integrity in extreme low humidity. Because it won't sag or migrate, it extends the service life of the cabinet.

Prices include the humidity control module and sensor. To ensure safe pressure release, order the Automatic RB Valve. Systems are available in stainless steel, acrylic or transparent static-dissipative PVC, which helps control static charges and the particles they attract.

Smart Performance — and Big Savings!

Testing demonstrates the cost benefit of the SmartDesiccator's automated nitrogen control system.

The test below was conducted on a 24"W x 18"D x 24"H desiccator equipped with a flowmeter and then with a SmartDesiccator™ control system, under the following conditions:

- Ambient Humidity: 60% RH
- Temperature: 70°F
- RH Setpoint: 10% RH
- Test Period: Achieve setpoint and then maintain it for 24 hours
- Chamber Access: Door opened once every 30 minutes; remains open for one minute

SmartDesiccator™ uses 22% of nitrogen consumed by standard cabinet—a 78% saving!

Desiccator with 0 - 20 SCFH flowmeter (red area on chart)

- To achieve setpoint: 85 cubic feet (requires over 4 hours @ 20 CFH)
Note: setpoint measured with a hygrometer, since this set up does not monitor humidity level.
- Maintain for 24 hrs: 480 cubic feet (24 x 20)
- Total N₂ Consumed: 565 cubic feet

SmartDesiccator™ (blue area on chart)

- To achieve setpoint: 85 cubic feet (required 30 minutes @ 170 cubic/hour on high flow)
- Maintain for 24 hrs: 40 cubic feet
- Total N₂ Consumed: 125 cubic feet

NitroPlex™ Humidity Control System

- Increases desiccator efficiency up to 400% to minimize nitrogen waste and moisture exposure
- Senses and displays relative humidity in each desiccator chamber independently for more efficient, cost-effective moisture control
- Cuts nitrogen expenses by over 75%
- Prevents moisture and contamination migration from one chamber to another
- Lets you specify a different humidity set point for each chamber
- Automatically delivers a high-flow nitrogen purge only to the chamber where it's needed, and only as long as it's needed to restore RH set point
- Ergonomic design allows easy viewing, eliminates chamber lip for easier parts removal
- Convenient hand-held computer (optional) monitors humidity conditions in each chamber, facilitates easy set point programming, datalogs chamber RH, and allows stored data to be transferred to a remote PC
- Can be integrated into almost any Terra desiccator line

Miniature LEDs display current humidity and RH set point

Increased Efficiency Lowers Recovery Time, Increases Yields

The NitroPlex™ system provides state-of-the-art automated humidity control to guarantee the integrity of stored components.

Each microprocessor-based multiplexed sensor/display module, one installed in each chamber, enhances desiccator performance and economizes on nitrogen expenses. It contains a miniaturized moisture sensor that reads the internal humidity level within $\pm 2\%$ of full scale. The LED readout displays this value or the programmable set point for that chamber.

When the humidity climbs above the set point in any chamber, the NitroPlex automatically directs a high-flow purge of clean, dry nitrogen only to the chamber where it is needed, and only for as long as necessary to bring the humidity back below the set point value.

Specifications

Dimensions:	1.5"W x 2.75"D x 1.5"H; increases height of affected chamber by 1.25"
(Humidity Module)	
Housing Material:	Stainless steel (chamber humidity modules)
Power Requirement:	110VAC, 50/60Hz or 220VAC, 50Hz (universal power supply)
Display:	5-digit LED
Display Resolution:	$\pm 0.1\%$ RH
Sensor Accuracy:	$\pm 2\%$ RH @ 20°C
Measuring Range:	0 - 100% RH
Calibration:	None required. A calibration mode is included for applications that require calibration to an NIST-traceable instrument.

Ordering Information

For Performance Data

See Inside Cover

You can convert any of Terra's standard desiccators into a NitroPlex™ System simply by adding an "NP" to the desiccator part number. Then, order one NitroPlex™ module (Cat. No. 1911-31A) for each desiccator chamber.

Example: Cat. No. 3950-36NP is a NitroPlex™ version of Terra's standard Adjust-A-Shelf desiccator. To complete the order, specify (10) chamber sensor/display modules.

NitroPlex™ Module Cat. # **1911-31B** \$/Each **595.00**
Includes humidity and door sensor switches, 5-digit LED display, Automatic RB® Valve. Order one per chamber.

Many Other NitroPlex™ Systems Available!

See Catalog 105, page 85, for an overview of Terra's other NitroPlex™-ready desiccator storage systems.

SmartPlex™

Hand-Held Monitor/Display Computer & Software

Includes software package customized for the specified NitroPlex™ desiccator configuration. Provides easy-view monitoring of humidity level, humidity set point, and alarm status in each desiccator chamber. Simplifies programming of separate humidity set point for each desiccator chamber. Includes 12VDC power supply and transformer for operation from 110VAC, 50/60Hz or 220VAC, 50Hz power supply. Serial interface allows downloading of storage data.

Standard Software Updates Inventory

The SmartPlex™ onboard database software lets you configure the system for your application. You specify number of chambers and contents of each chamber, including detailed information on each product stored (description, part number, quantity and more).

The SmartPlex™ then searches by product name or part number and provides detailed information on quantities on hand, storage history, and environmental conditions. This information can then be downloaded to a remote PC for analysis or print-outs.

* Constructed of transparent static-dissipative PVC; removable back wall made of nondissipative material. **For use in acrylic cabinets. Select stainless steel shelves for use with static-dissipative PVC cabinets. *** Acrylic is damaged by alcohol and other cleaning agents.

Better Doors — Long-Lasting Cabinets!

Doors are typically the only desiccator component to show signs of wear. These improvements safeguard your investment in clean, dry storage!

LiftLatches™ — Standard on all models, these noncontaminating, durable lifting latches operate without straining hinges. Locking LiftLatches are available.

Stainless Steel Door Frames — A highly recommended option that lends strength and rigidity to plastic doors!

One-Piece, Nonadhesive Gaskets — Standard on all models with stainless steel frames, these durable gaskets are mechanically attached to eliminate adhesives.

No Nitrogen Required!

DesiTray™ Renewable Drying Tray

Desiccant tray (select silica gel or molecular sieve) maintains humidity down to 5% RH in any standard Terra desiccator cabinet.

Regenerates in minutes for repeated use. See page 19.

** Price for a shelf, shield, or tray of a given size is the same. To order electropolished stainless steel shelving, add "-2" to the catalog no. and 30% to the price.

Smart Desiccator™—

Saves up to 78% of nitrogen costs!

See page 3 for the SmartDesiccator™, Terra's automated storage environment that incorporates a humidity control system.

Series 100-300 Stainless Steel Desiccators

Terra manufactures several lines of stainless steel desiccators, for applications ranging from benchtop storage to multiplexed humidity control. All feature the one-piece gaskets and LiftLatches for superior service life and sealing performance.

Note: Series 100 and 300 desiccators include shelf racks on a standard basis. Racks must be specified for other models if shelves are required.

A/B. Series 100 Benchtop Stainless Steel Desiccator

Air-tight seals and all-stainless steel construction maintain a low-humidity storage environment to keep parts clean and dry. Inlet/outlet ports allow nitrogen purging (see page 18 for ordering information on optional nitrogen controllers). Transparent static-dissipative PVC windows protect against static and particle build-ups.

Electropolishing Available!

Series 400

Stainless Steel Desiccators

The Series 400 Stainless Steel Desiccator provides the optimal clean, low-humidity environment for sensitive parts.

Available in many chamber configurations, it includes front and rear static-dissipative PVC viewing windows for full visibility of stored contents. Static-dissipative PVC helps control static charges and the particles they attract.

All models feature a plenum chamber that ensures uniform distribution of nitrogen purge gas.

NitroPlex™-Ready!

Terra fabricates these desiccators for use with the NitroPlex™ humidity control system, the most advanced nitrogen purge controller available. Equipped with the NitroPlex™, these systems automatically regulate a nitrogen purge in order to maintain any relative humidity set point you require—down to 0% RH. See page 4 for more information.

Temperature/Humidity Gauge

Kiticcator™

Kitting Tray Desiccator

This desiccator provides organized, space-efficient storage of kitting trays (tote boxes) in a clean, dry, static-safe environment.

Electropolished stainless steel wire racks are designed specifically for secure storage of any of three common tote boxes (see ordering information below). Trays can be inserted and removed without disturbing any others in the cabinet.

Like Terra's other desiccators, these hermetically sealed cabinets are designed to maintain particle-free, low-humidity storage conditions when purged with nitrogen or clean dry air (see purge controllers on page 18).

Kiticcator™ No. 6003-00A, shown with optional stainless steel door frames, stand and nitrogen controls

Tote Boxes (for Kiticcators)

Made of durable, static-dissipative high-density polyethylene thermoplastic. Meets the minimum static decay specifications of MIL-B-81705B. See Catalog #105, page 105 for more information.

Tape-and-Reel™ Desiccator

Terra's Tape-and-Reel™ Desiccator gives you the optimal storage environment for semiconductor component reels.

Mix and match reels of several sizes in one easy-access cabinet that conserves space. Adjustable stainless steel racks safely support carrier reels of many widths, up to 14" in diameter (order appropriate reel supports separately). Like Terra's other desiccators, these hermetically sealed cabinets are designed to maintain particle-free, low-humidity storage conditions when purged with nitrogen or clean dry air (see purge controllers on page 18).

Adjustable Reel Supports

Stainless steel supports can be adjusted in ¼" increments to form holding bins for many reel sizes inside Terra's Tape-and-Reel Desiccator.

Wafer Box Desiccator

These desiccators are designed specifically to maximize storage efficiency of standard lot boxes used for 200mm and 300mm wafers.

They feature the same advanced technology features of standard Terra desiccators, including the most efficient sealing techniques available. For optimal performance, select the optional stainless steel door frames, which extend cabinet life and improve sealing performance through the use of one-piece, non-adhesive gaskets. See Catalog 105, page 92 for more information.

Portable Desiccators

- A convenient, contamination-free, economical carrying container for moisture-sensitive devices
- Stackable design permits space-saving storage
- Optional quick-connect and Automatic RB® (Relief/Bleed) Valve allow nitrogen purge for a particle-free, low-moisture environment
- Static-dissipative PVC option ensures ESD-safety, eliminates particle attraction to ensure clean surfaces

Faraccator™

Static-Safe Desiccators

These desiccators employ a Faraday-cage design that completely shields stored parts against electrostatic charges. Static-dissipative PVC construction controls surface charges and the particles they attract (acrylic models also available).

All models come with removable stainless steel trays mounted on noncontaminating runners. Select models with or without stainless steel insert packages, which provide convenient storage bins for 2" waffle (die) packs.

Configurations also available for 3"-deep and 5"-deep trays—click on "Desiccators" at TerraUniversal.com for complete ordering information.

Optional Features (see page 18 for nitrogen controllers)

Process Gas Generators & Dryers

Terra's gas generators and gas dryers provide several ways to produce a dry, particle-free environment inside glove boxes, desiccators, and other enclosures.

Membrane separation systems operate with no moving parts and require almost no maintenance. The Nitrogen Generator uses this technology to provide a reliable source of clean, dry nitrogen.

Nitrogen Generators

Purity vs. Flow Rates (@100 PSI inlet feed, 72°F*)

Model	99%	98%	97%
No. 2700-12A	7.4 CFH	10.2 CFH	12.5 CFH
No. 2700-11A	49.0 CFH	65.0 CFH	75.0 CFH
No. 2700-09A	126.0 CFH	180.0 CFH	223.0 CFH

* Higher flow rates can be achieved with higher feed temperature (see Terra's process gas heater, No. 9450-00).

Control Unit (draws power from Dual Purge)	9500-00A	866.00
Humidity Sensor (order one per cabinet)	9500-02A	490.00

D. Automatic RB® (Relief/Bleed) Valve

Automatically relieves pressure build-ups to ensure safe operating conditions with Terra's gas control systems. One valve recommended per storage chamber. See Catalog 105, page 130.

	Cat. #	\$/Each
	1600-60B	94.00

E. Flowmeters

For static control of nitrogen purge in small benchtop desiccators.

Note: Because flowmeters cannot vary nitrogen flow in response to operating conditions, they increase nitrogen expenses and are not recommended for large cabinets.

Flow Range	Cat. #	\$/Each
1 – 10 SCFH	1600-31	94.00
2 – 20 SCFH	1600-32	94.00

F. Desiccator Ionizing Modules

These low-voltage ionizers minimize EMI/RFI and safety hazards. Emitters, mounted in a 304 stainless steel housing in the desiccator plenum chamber, direct balanced streams of positive and negative ions to safely neutralize static charges. With a gas flow of around 20 SCFH, the module provides static discharge time of less than 10 seconds (1000V to < 100V).

Terra offers a standard module for each desiccator; visit TerraUniversal.com for pricing and additional specifications.

G. GroundWatch™ Continuity Indicator

Monitors integrity of ground connections on Terra desiccators.

	Cat. #	\$/Each
110VAC, 60Hz	4400-00	334.00
220VAC, 50Hz	4400-00-220	334.00

H. Ionizing Blow-Off Gun

Safely neutralizes surfaces with pinpoint accuracy. Also removes surface contaminants. Durable, noncontaminating hardware is cleanroom compatible.

	Cat. #	\$/Each
Cleanroom Ionizing Air Gun	2005-50	548.00
AC Power Transformer		
120VAC, 50/60Hz	2005-09A	34.00

J. Humex 2™ Humidifier

Provides inline humidification of nitrogen or other process gas being fed into a desiccator, glove box or similar enclosure. Ideal for accelerated life studies at differing humidity levels, particularly in a NitroPlex cabinet with multiple set point control. Quick vaporization module eliminates moisture sputtering. Flow rate: 15 CFM.

	Cat. #	\$/Each
Humex 2™ 110VAC, 50/60 Hz	9081-02	2,248.00
Humex 2™ Humidity Sensor	9500-02A	490.00

M. DesiTray™ Renewable Drying System

These DesiTrays™ create a convenient dry storage environment inside any Terra desiccator, maintaining a humidity level down to 5% RH.

Their low-profile design allows insertion below adjustable shelving, consuming virtually no storage space. The noncontaminating stainless steel housing contains your choice of silica gel or molecular sieve. To regenerate the DesiTray™, simply heat it inside any appropriate lab oven until the indicating desiccant turns blue.

	Cat. #	\$/Each
Stainless Steel DesiTray™	1900-01	222.00

General Purpose Storage Cabinets

- Economical storage cabinets are ideal for many laboratory, cleanroom and stockroom applications
- HEPA-filter/blower option provides a continuous downstream of particle-free air
- Select acrylic for full visibility and economy, or polypropylene for strength and chemical resistance

Clean, Durable, Economical

All cabinets feature double full-height access doors that require minimal clearance space. The durable hinges are spring-loaded and, together with gaskets, ensure a tight seal and a clean environment for stored materials.

For critical contamination-control requirements, select a model with an integral filter/blower module. This unit, mounted to the top of the cabinet, features a 740 CFM variable speed impeller that directs a continuous stream of HEPA-filtered air downward through the storage area.

All models with HEPA filter/blower modules feature shelf perforations to allow air distribution throughout the cabinet. They are available with either acrylic or static-dissipative PVC doors (dissipative PVC offers complete visibility in addition to dissipative characteristics and excellent chemical resistance).

Heated Processing Chamber

- Ideal for work with biological samples, microelectronics-based surgical tools, medical implants, and other critical components requiring above-ambient calibration or testing
- Recirculation system ensures uniform heating of the internal environment up to 140°F
- Transparent polycarbonate front and sides allow full visibility of chamber
- Hinged access door with PVC parting curtain allows introduction of large materials when opened

Specifications

Dimensions: 19"W x 24"D x 15"H
 Materials: Polycarbonate (front and side of processing chamber); 304 stainless steel (blower/heater housing and diffusers)
 Blower: 230 CFM motorized impeller with automatic thermal protection (adjustable 40-70°C)

RH/Temperature Stability Chamber

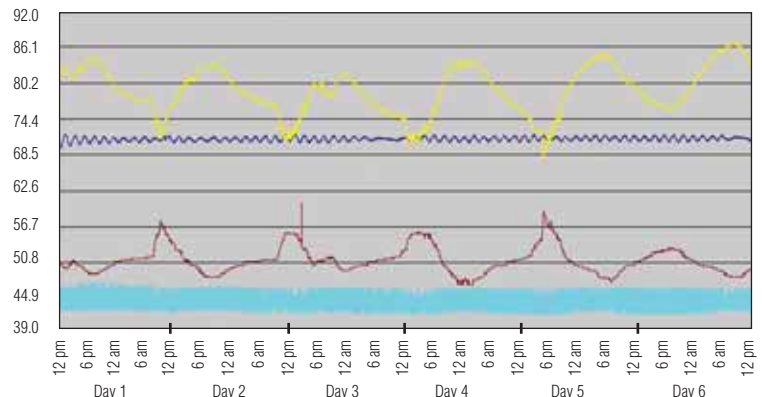

This acrylic cabinet is customized for storage of polycarbonate films used for high-precision screening of circuit boards. It maintains critical relative humidity and temperature levels to prevent dimensional aberrations that result from exposure to humidity and temperature fluctuations.

Air circulates horizontally across the shelves that hold the film. As air exits the storage area, it passes through an air conditioning/heating module that conditions it to within $\pm 2^\circ\text{F}$ of the temperature set point. In addition, the continuously operating A/C module removes moisture to keep the %RH level within $\pm 3\%$ of the set point.

If humidity falls too low, an ultrasonic humidifier cycles on to add the proper amount of water vapor. If the temperature falls too low, the heater module cycles on. A water filtration system removes contaminants from the humidification feed water to eliminate the chance of mineral deposits or other vapor-borne contaminants.

As the process air exits the RH/temperature modules, an impeller blower draws it into an intake plenum area and forces it uniformly back through the storage area.

Ref. No. 2148-10A
 Available in acrylic or stainless steel

Humidity Accuracy:
 $\pm 3\% \text{RH}$ within $\pm 20\%$ of ambient
Temperature Accuracy:
 $\pm 2^\circ\text{F}$ within $\pm 10^\circ\text{F}$ of ambient

Cleanroom Shelving

A. Super Adjustable™ Wire Shelves

Just lift the release on each corner, adjust your shelf at precise 1"-increments, and clamp the release lever shut. In seconds, you can optimize your storage system to changing load requirements, with no tools, no wasted time, and no wasted space. For shelf grounding in static-sensitive applications, select conductive sleeves below.

Racks & Shelving From Eagle Group

These economical cleanroom and laboratory shelves use four truss wires for greater strength. Posts allow shelf height adjustment at 1-inch increments. Plastic split sleeves are included with each shelf; for grounding in ESD-sensitive applications, select optional aluminum split sleeves.

Eaglegard® Hybrid Epoxy: Durability and Microbial Protection

Shelving and posts featuring Eaglegard® hybrid epoxy coatings inhibit the growth of mold, microbes and other organic contaminants. These units carry a 15-year limited warranty.

Aluminum Split Sleeve
For grounding. One per shelf required.

Garb and Parts Dispensers

Space-Saving Convenience!

These handy dispensers save space and organize gloves, safety glasses, wipers, hats, and other garb. They're perfect benchtop storage bins for small parts used in cleanroom processing. Select clear acrylic or static-dissipative PVC, which eliminates static charges and the particles they attract.

Cleanroom Accessories

A-F. Step Stools and Ladders

Fabricated of 304 stainless steel and electropolished to ensure an ultra-smooth surface, these step stools and ladders include spring-loaded safety casters that retract under load. Perforations limit particle accumulation. Custom sizes available.

G-K. Cleanroom Waste Receptacles

These foot-pedal operated receptacles provide the perfect solution to cleanroom waste disposal problems.

Fabricated of 304 nonmagnetic stainless steel and available with electropolishing, they are designed to provide years of constant service in the cleanroom without contamination. Their no-spring foot pedal lets an operator dispose of waste without the need to touch the receptacle, and the tight-fitting, gasketed lid forms a nearly air-tight seal to contain waste safely.

*HEPA-filtered air jets
remove contaminant's*

Cleanroom Pass-Through Chambers and Air Showers

*Custom work is no problem —
Terra builds to your specifications*

Pass-Throughs and Air Showers allow contamination-free transfer of personnel and products in and out of the cleanroom. Terra offers the most comprehensive selection of designs and features available anywhere —

Hundreds of Standard Configurations

304/316 stainless steel • chemical-resistant and static-safe plastics • clean laminates • HEPA air showers • wall and floor-mount designs • mechanical interlocks • slide-up or swing doors • shelves and special lighting

No-Clearance Roll-Up Door Pass-Throughs

Several standard sizes • PLC control panel includes safety and security features • electronic interlock prevent cross-contamination • HEPA air showers

Application-Specific Designs

Fire-rated models • active and passive ventilation modules remove fumes • electropolished models meet the most strenuous cleanliness requirements • smooth, radius corners eliminate cracks that harbor contaminant's

A. Acrylic Pass-Through No. 1993-12A / \$316, mounted to a Terra hardwall modular cleanroom.

B. Stainless Steel Pass-Through No. 6705-26A / \$3,002 — models available in 15 standard sizes.

C. Slide-Up Door Pass-Through No. 1993-18 / \$1,074 — counterweighted sliding doors are easy to operate.

D. Roll-Up Door Pass-Through No. 6705-12A / \$8,678 — PLC-controlled, electronically interlocked doors eliminate clearance requirements.

E. Air Shower No. 6010-14A / \$11,019 — directs high-speed HEPA-filtered air through adjustable nozzles to remove contaminant's from personnel before they enter the cleanroom.

F. Air Shower Pass-Through No. 6705-70 / \$8,788 — ideal for removing contaminant's from carts

Fire-Rated Model No.
6705-00A

Ventilation Modules

Modular Cleanrooms

Free-standing, all-steel structures create sturdy, versatile clean processing solutions that meet cleanliness requirements to Class 10 (ISO 3). Whatever your application, Terra delivers a pre-tested, turnkey system.

Hardwall Designs

- Acrylic or static-dissipative rigid panels for full visibility
- Steel support frame spans up to 20 feet without internal pillars or external supports
- Mirror-finished stainless steel trim creates a showcase exterior
- A/C and humidity controls
- Available raised floors optimize laminar airflow

Softwall Designs

- Portable, expandable, easy to assemble and disassemble
- Curtain panels and parting strip shields, in anti-static cleanroom-grade vinyl
- Rigid steel support frame requires no ceiling supports
- Casters available

Configured to Your Specifications!

- Air conditioning
- Humidification/Dehumidification
- Rapid-Operation Doors
- Raised Floor

Terra's online **QuickQuote Planner** configures a room to your specifications:
www.TerraUniversal.com

BioSafe™ All-Steel Designs

- Perfect for ultra-clean applications requiring frequent cleaning or sterilization
- Smooth interior walls with radius corners eliminate cracks that harbor germs and particles
- 304/316 stainless or powder-coated steel panels
- Negative-pressure airflow designs available for fume venting

Wet Processing & Cleaning Cabinet

- Incorporates all processing components into one self-contained, easy-to-clean system
- Isolated control panel allows safe, convenient operation of baths, rinsers and other process modules
- Whatever the requirements, Terra delivers a pre-configured, tested, turnkey system

These self-contained Wet Processing Cabinets are ideal for a wide range of cleaning and processing requirements.

Standard models below include a reinforced cabinet of the specified size and material, a sliding access shield, and a fluorescent illuminator. Select sinks, baths, etchers and other processing modules to suit your application. A raised lip surrounds the work area to contain spills, and a full-length plenum sink located under the deck contains overflow for easy disposal (select plenum flush for easy cleaning).

A control panel mounted to the side of the deck provides safe, convenient access to all system controls (order processing sinks and baths separately; see pricing and specifications at TerraUniversal.com). Optional Filter/Blower Module provides a vertical laminar flow of HEPA-filtered air for particle-sensitive applications.

Wet Processing Cabinets (standard height = 72")						Filter Blower Module			Plenum Flush		Ionizing Bar	
Overall Width	Work Area Dimensions	Polypropylene		Stainless Steel		Includes 99.99% efficient HEPA filter 115VAC, 60Hz 230VAC, 50Hz			PVC with H ₂ O Nozzles & Valves			
		Cat. #	\$/Each	Cat. #	\$/Each	Cat. #	Cat. #	\$/Each	Cat. #	\$/Each	Cat. #	\$/Each
84"	72"W x 24"D	7018-00	19,792	7018-01	31,227	7018-04	7018-04-220	3,027	7018-50	937	2005-37	892
108"	96"W x 24"D	7018-02	22,444	7018-03	34,011	7018-05	7018-05-220	3,315	7018-51	1,081		

Note: All models listed above include an adjustable PVC sliding sash (to restrict airflow to the work area), a static pressure exhaust meter (to monitor the pressure differential in the exhaust line), and a fluorescent illuminator. All electronic controls are located on a vertical panel to the right of the work area (left side mounting may be specified at no extra charge). PLC controllers are also available; call for quotation.

Features & Accessories

**You Specify the Process Workflow—
Let Terra Take Care of the Rest!**

Constant-temperature baths and dump rinsers in quartz, polypropylene, PVDF, 304/316 stainless steel and other high-purity, chemical-resistant materials

Carboys and Reclamation Tanks

Sinks, goosenecks, air/de-ionized water spray guns, aspirators and other utilities

Laminar Flow Hoods & Work Stations

These economical, HEPA and ULPA-filtered systems provide a particle-free environment for work with contamination-sensitive materials.

- **Front and side access shields confine the clean processing area**
- **Ionization module controls surface static charges and the particles they attract**
- **Free-standing and benchtop configurations**
- **Fluorescent and germicidal lighting**

Terra's **QuickQuote Planner** configures a system to your specifications:
www.TerraUniversal.com
 Just click on **Hoods**

- A. Vertical Laminar Flow Station** – Available in powder-coated or 304 stainless steel, this free-standing system can be used with Terra's Wet Processing Stations. Optional motorized sliding shield restricts access to the work surface and improves system efficiency. Model shown: No. 2001-83 / \$7,327 (100"W x 35"D x 91"H), with optional work bench and drawer unit. Order filter fan modules separately.
- B. CleanBooth™ Laminar Flow Station** – Standard unit includes a mobile support frame and choice of HEPA or ULPA filter/fan units. Optional side panel kits enhance system efficiency. Model shown: No. 1870-02 / \$1,045 (73"W x 25"D x 82"H with filter/fan unit; order HEPA or ULPA filter/fan units separately).
- C. PureFlow™ Laminar Flow Cart** – onboard power cell ensures continuous HEPA filtration of the storage area while materials are transferred across a facility. Model shown: No. 1529-63A / \$12,900 (order power cell separately).

Laser Particle Counters

Comprehensive Environmental Monitoring!

Handheld Particle Counters/ RH/Temperature Meters

These NIST-traceable units offer six simultaneous particle-count ranges and display both cumulative and differential particle count data as well as temperature/RH on a touch-screen display. Complete line of options includes printer, air velocity probe, differential pressure probe, and transfer software for data downloading to PC. Meets JIS standards. Flow rate: 0.1 CFM.

Channel Sizes (µm)	Cat. #	\$/Each
0.2, 0.3, 0.5, 0.7, 1.0, 2.0	1509-01	5,433.00
0.3, 0.5, 0.7, 1.0, 2.0, 5.0	1509-03	3,277.00
0.3, 0.5, 1.0 3.0, 5.0, 10.0	1509-04	3,277.00
0.5, 0.7, 1.0, 3.0, 5.0, 10.0	1509-08	3,183.00

3100+/5100+ Portable Particle Counters

These NIST-traceable units display up to six simultaneous particle-count ranges on a 5.7" color touch screen. They store data (up to 3,000 samples) from up to four environmental sensors (4-20 mA). Includes a built-in printer and internal audible alarm. Meets JIS standards. Flow rate: 1.0 CFM.

Channel Sizes (µm)	Cat. #	\$/Each
0.3, 0.5, 1.0 3.0, 5.0, 10.0	1509-21	7,922.00
0.5, 0.7, 1.0, 3.0, 5.0, 10.0	1509-23	7,641.00

Handheld Laser Particle Counter

Rechargeable internal battery.

Particle Size Ranges	Cat. #	\$/Each
0.5µm & 5µm & larger	1506-02	2,693.00
0.3µm & 0.5µm & larger	1506-03	2,805.00

Particle Concentration Meter/Particle Counter

Particle counter – provides continuous count for one minute.

Particle Size Ranges	Cat. #	\$/Each
>0.5µm	1506-97	1,876.00
>0.3µm	1506-98	2,102.00

Concentration meter – samples air every 6 seconds.

Particle Size Ranges	Cat. #	\$/Each
>0.5µm	1506-95	1,876.00
>0.3µm	1506-96	2,102.00

Exhaust Fume Hoods

D

E

F

These systems incorporate activated charcoal filtration modules for ductless removal of chemical fumes. Dozens of standard design are available, in vertical and horizontal flow configurations, including models with large access openings for large process equipment or chemical flasks.

- **Polypropylene designs resist wide range of acids**
- **Explosion-proof blowers and lighting available for use with flammable vapors**
- **Final HEPA/ULPA filters remove sub-micron particles for cleanroom use**
- **Options include air flow monitoring equipment, ionizers, and complete line of work benches, including vibration-isolated tables**

D. Exhaust Fume Hood – Sliding access shield restricts work area and enhances system efficiency. Connects to in-house ventilation system; select optional filter/blower module for ductless operation. Model shown: No. 2400-05 / \$7,613 (76"W x 35"D x 98"H), shown with optional work bench.

E. High-Clearance Fume Hood – Ideal for use with bulky process equipment, glassware, or other large parts. Available in several hood materials. Dual impeller blower maintains exhaust flow of 10 fpm; charcoal filter removes vapors. Model shown: No. 2900-30 / \$3,171 (32.5"W x 25"D x 48"H)

F. Benchtop Ductless Exhaust Fume Hood – This high-capacity, turnkey system features dual blowers to ensure a safe exhaust flow speed of 100 fpm. Polypropylene construction resists acids, and air speed meter monitors operation. Includes vapor-sealed fluorescent illuminator. Model shown: No. 2900-20 / \$3,180 (45"W x 28"D x 27"H).

Gloveboxes

G

H

Terra's **QuickQuote Planner** configures a system to your specifications: www.TerraUniversal.com
Just click on **Gloveboxes**.

Terra Universal's plastic and stainless steel gloveboxes provide the perfect controlled environment for a host of containment and isolation applications. Select the standard control modules to your requirements and let Terra deliver a pre-tested, turnkey system.

Dehumidification: nitrogen controllers maintain programmable humidity levels to 0% RH (< 0.5 ppm water vapor)

Humidification: using water vapor or ultrasonic misters

Temperature: -40°C to +300°C

Particle and Germ Control: HEPA and ULPA filtration modules

Static Safety: ionization modules and dissipative materials

Vacuum: pass-through chambers and negative-pressure gloveboxes

G. Hazardous Material Containment Chamber – This 12-gauge, 304 stainless steel glovebox features counter-balanced port hatches and bag-in/bag-out ports for easy material transfer. Smooth, radius corner simplify cleaning and eliminate particle traps. Maintains a low leak rate < 0.5% of internal volume/hour (tested under vacuum). Ref. No. 1695-10.

H. Series 400 Stainless Steel Glovebox – This versatile design allows attachment of air locks, vacuum antechambers, or pass-through vacuum/nitrogen ovens. This chamber is designed for purging with clean, dry process gas; optional controllers allow precise control of water vapor or trace gas. Model shown: No. 1694-13A / \$7,692, shown with vacuum antechamber, vacuum controller, and Dual Purge nitrogen controller.

Terra's Comprehensive Guide to **Critical Environment Solutions**

Your product source if you face these challenges –

- Particle Filtration (HEPA, ULPA, Nano)
- Humidification/Dehumidification
- Low/High Temperature
- Vacuum Control
- Laminar Flow Control
- Static Neutralization
- Dissipative Materials
- Chemical Vapor Removal
- Nitrogen & Clean Dry Air Generation
- Antimicrobial Treatments
- Process Gas Conditioning
- Radiation Containment
- Cytotoxin Control
- Ultra-clean Materials
- UV Sterilization
- Ergonomics
- Vibration Isolation
