Turnkey Systems

Terra Universal Gloveboxes Custom Configurations— On a Standard Basis!

Terra's versatile designs let you configure a chamber to your exact process specifications—using standard control modules and standard pricing!

Whichever modules you select, Terra will deliver a tested, turnkey system that's ready for service!

Step 1: Select Enclosure Style and Material

Plastic Gloveboxes
(Series 100 and 200)

Stainless Steel Gloveboxes
(Series 300 - 600)

Glovebox: (See overview on facing page)	Series 100 Plastic	Series 200 Plastic	Series 300 SS	Series 400 SS	Series 500 Full View	Series 600 Front View
Control Capabilities*

Static Neutralization	•	•	•	•	•	•

* With selection of appropriate accessories
** Specify double-wall, insulated design for improved efficiency

Step 2: Select Environmental Control Modules

Humidity Control—Begins on page 23

These modules monitor and regulate the process gas to maintain the humidity level you specify. Low-humidity modules achieve desired conditions by regulating the purge gas (nitrogen, argon, or dry air).

Process Gas Generation & Analysis—Begins on page 22

Terra provides gas generators, mixers, and monitors to guarantee a reliable processing environment.

Temperature Control—Begins on page 24

A wide range of process temperature solutions, from -40° to +300°C. Double-wall, insulated gloveboxes ensure stable temperatures. The Sequence Controller allows multi-cycle process documentation and control.

Vacuum Control—Begins on page 26

Control modules and pumps are available for a wide range of process pressures, from 5" WG to one atmosphere.

Static Control—Begins on page 25

Terra engineers will configure the right combination of ionizers and dissipative materials to protect sensitive parts against ESD.

Particle and Germ Control—Begins on page 21

Terra helps you meet cleanliness requirements as low as Class 1 through laminar flow and HEPA/ULPA filtration technologies. Radius corners and ultra-clean materials contribute to a clean, aseptic processing environment.

Laminar Flow and Exhaust Hoods—Begins on page 27

Custom Modifications

Our engineers work hand-in-hand with yours to develop cost-effective solutions to unique application challenges.

- Custom Sizes
- Equipment Interface Modules
- Double-wall Construction
- Special Inlet/Exhaust Filtration
- Easy-clean radius corners
- Process Equipment Enclosures
- Process Control Software
- More!

Standard Gloveboxes

A/B. Series 100 Plastic Gloveboxes

– See page 8

- Available in five materials–
 - ✓ Polypropylene
 - ✓ Static-Dissipative PVC
 - ✓ Non-Dissipative PVC
 - ✓ Acrylic
 - ✓ Polycarbonate

C. Series 200 Plastic Gloveboxes

– See page 10

- Designed for negative pressure operations (to 5" WG)
 - ideal for degassing, drying and ventilation

D. BioSafe™ Gloveboxes

– See page 17

- Smooth, rounded corners with continuous seam welds for easy disinfection

E/F. Series 300 Stainless Steel Gloveboxes – See page 12

- Ideal for seam welding, leak testing, and other semiconductor and pharmaceutical processes
- Versatile side flanges allow easy installation of air locks, vacuum ovens, and other modules

G. Series 350 Stainless Steel Gloveboxes – See page 12

- Single side access via glove ports
- Dual side viewing windows

H. Series 400 Stainless Steel Gloveboxes – See page 14

- Accommodates pass-through vacuum antechamber
- Roomy processing area

I/J. Series 500/600 Full-View Gloveboxes

Series 500 – See page 16

- Features opposing arm ports for dual-side access
- Transparent static-dissipative PVC or polycarbonate front/rear panels

Series 600 – See page 16

- Polycarbonate or safety glass front window
- Accommodates air locks and other access modules

Series 100 – Polypropylene

Series 100 – Acrylic

Series 200

BioSafe™ Glovebox for sterile processing

Series 300 with swing-up door

Series 300

Series 350

Series 400 with vacuum antechamber

Series 500

Series 600

System shown:
Cat. # 1695-03

Refrigerated, Low-Humidity Chamber

This chamber includes a refrigeration module capable of maintaining temperatures as low as -20°C. The stainless steel chamber features double-wall construction with 2" of polyurethane insulation for optimal thermal efficiency. A humidity control system, including a variable purge controller and automatic humidity controller, regulates the nitrogen process gas to maintain an internal moisture level as low as 2%RH.

A microscope bellows accommodates the protein analysis equipment.

Sample Application:
Protein Analysis

Sample Application:
Material Stress Testing

Temperature/Humidity Cycling Chamber

This glovebox is ideal for accelerated-life testing of elastomers, fiber composites, and other materials over a broad range of temperature (-20°F to +140°F) and humidity (5 to 95% RH).

Double-wall construction is provided on all sides. Viewing windows are double-pane polycarbonate for strength and temperature resistance. Stainless steel walls include 4" of polyurethane insulation.

A pass-through oven on one side of the processing chamber allows degassing at temperatures up to 300°C, and an opposing-side air lock allows parts removal. A closed-loop recirculation module continuously recycles air through a HEPA filter and an activated charcoal filter for removal of organic vapors.

System shown:
Cat. # 1695-02

Ordering Information

Begins on page 8

Pharmaceutical Compounding Chamber

Designed specifically for compounding pharmacists, this isolation chamber meets the requirements of USP<797> for sterile compounding. Fabricated of 304 stainless steel, its low-noise, low-vibration HEPA filter/fan module creates a contaminant-free environment. Smooth surfaces are easy to sterilize, and the sloped bottom includes a drain. The ergonomically sloped front window tilts open for sterile filling stations and other large process equipment; swing door accommodates vials, IV bags and smaller materials. Includes bag-out wasteport, IV rod and light.

Closed-loop recirculating models available

Bag-out waste port and optional power-strip

Model shown: Cat. No. 2900-46

Particle-Free, Low-Humidity Glovebox

Designed to provide a clean, moisture-free environment, this glovebox is large enough to accommodate wafer spinners used in the deposition process. Its rounded internal corners also make it ideal for pharmaceutical powders.

It incorporates a high-volume process gas mixer that controls percentages of two process gases. A three-sided plenum design recirculates the process gas through dual filter/fan modules for HEPA filtration (99.99% efficient @ 0.3µm particles). The bottom plenum includes cooling coils that compensate for heat-generating process equipment to ensure a constant temperature of 68°F.

Dual-side air locks afford easy loading and unloading of wafers.

**Sample Application:
Photoresist Deposition**

Radius corners allow easy cleaning

*System shown:
Cat. No. 1695-01*

Stable Temperature/Humidity Containment Glovebox

This glovebox safely contains potential biohazards while providing a stable environment over a broad range of temperatures (-2°C to 36°C) tested at various humidity levels between 0 and 75% RH. The stainless steel chamber features 2" of insulation and internal dimensions of 33" x 33" x 33" (overall dimensions: 37"W x 37"D x 52"H). A high-capacity air conditioner holds a stable temperature down to -2°C , and a 4000W heater integrated into the evaporator coil achieves temperature stability to 36°C . The dry nitrogen feed gas provides a low %RH; an ultrasonic humidifier provides elevated RH to 74% without moisture condensation. The chamber includes a bag-in/bag-out port that can be used for transferring waste out of the chamber. The large swing-up access door allows easy cleaning of the chamber.

Bag-In/Bag-Out Port

9"-dia. port with closure operated from glovebox interior. Specify for any Terra glovebox.

Radioactive Material Handling Chamber

This 12-gauge stainless steel isolation glovebox is designed for safe handling of radioactive materials used in medical applications. It features two chambers connected by a vacuum port. One-piece gaskets and heavy-duty counter-balanced port hatches ensure a low leak rate of 0.5% of the volume of the total enclosure per hour (tested under 5" WG of vacuum).

System shown:
Cat. No. 1695-10

Ordering Information

Begins on page 8

Pharmaceutical Packaging Chambers

Designed for safe handling of pharmaceutical powders, this containment glovebox operates under negative pressure. Multiple ventilation ports ensure containment of powders when access doors are opened, and dual vacuum lines allow connection of vacuum wands for easy clean-up of powder spills.

Powder containers are introduced into the outside chambers via dual pneumatically operated, footswitch-activated doors; a loading platform at the rear of the unit accommodates bulk containers. A large opening on the bottom of the central chamber connects to a containment drum by means of a rubber bellows, allowing safe removal of large packages or loose powder. Overall dimensions: 104"W x 32.5"D x 33"H.

System shown:
Cat. # 1695-27

Pneumatic doors with rear loading platforms

Ventilated Hazardous Environment Chamber

In this application, potentially lethal CO gas is fed into a large chamber at precise concentrations to allow accurate sensor calibration.

A gas mixing system maintains a ratio of 2% CO/98% air during calibration. To meet requirements for high-humidity sensor performance, a Humex™ humidifier raises the moisture level inside the chamber to 95% RH. A process gas heater and cooler provide precise calibration temperatures. Circulation fans ensure uniform temperature and humidity throughout the main chamber. An emergency ventilation system evacuates the CO/air mixtures from the main chamber.

Sample Application:
Carbon Monoxide
Sensor Calibration

Model shown:
Cat. No. 1695-08

Pneumatic door airlocks—
see page 18

Low-Humidity, High-Capacity Processing Chamber

Ref. No. 1695-11

This custom glovebox provides optimal visibility and convenient access to a large, humidity-controlled processing area. Dual footswitch-activated pneumatic doors simplify parts insertion through large antechambers. The Dual Purge System and DewWatch humidity control systems maintain a user-selected sub-ambient moisture level down to 1 ppm(v).

Biological Research Chamber

Ref. No. 1695-12

This chamber maintains several critical environmental control capabilities essential for medical device biocompatibility testing, tissue cultivation studies, and other biological research:

Humidification/Dehumidification Cycling: Under precise PLC set point control, the system purges the chamber with water vapor to humidify the process environment; or with dry nitrogen to drive the humidity level below 1% RH. An onboard RO filter system removes contaminants from the water vapor.

Oxygen Concentration Control: Maintains precise O_2 set point concentration down to 0% to allow anaerobic processing.

Heating/Refrigeration Modules: Rapid cycling between 40° and 140°F.

VHP® Biodecontamination System: Vaporized hydrogen peroxide sterilizes the chamber between processing operations. A silica gel filtration module helps maintain a precise 30% H_2O_2 concentration.

HEPA Filtration: Process gas circulates through a 99.99% HEPA filtration module to remove airborne contaminants.

® VHP Biodecontamination is a registered trademark of Steris Corporation.

Low-Humidity, Easy-Access Glovebox

- Space-saving corner installation
- Dual pneumatically operated, footswitch-activated access doors

This glovebox makes optimal use of corner dead space and accommodates large process equipment. The unique chamber design and dual pneumatic doors put parts within easy reach of gloved operators (see more information on pg. 18).

A humidity control system regulates the flow of clean, dry nitrogen into the processing chamber to maintain any user-selected, sub-ambient humidity level. For optimal cleanliness, a closed-loop filtration system draws process gas through a 99.99% efficient HEPA filter; a diverter valve allows 100% recirculation or partial exhausting.

System shown: Cat. # 1695-28

Mini-Environment Equipment Enclosure

Interchangeable access ports let you configure the optimal enclosure for your application —

- Solid Panels
- Glove Ports
- Iris Ports
- Access Doors
- Microscope Bellows
- Custom Interface Modules

These Mini-Environment Equipment Enclosures provide a controlled environment for delicate process equipment. Each includes dual front doors for easy access. The bottomless design allows convenient placement over equipment; select the optional spill tray if a bottom is required. Standard size: 49"W x 25"D x 30.25"H (without filter/fan module). Door opening: 22.38"W x 22.25"H (for each door).

Spill Tray

2"H tray safely contains chemical spills and is easy to clean.

Series 100 Polymer Gloveboxes

- An economical controlled processing environment for a wide range of manufacturing and testing operations
- Dual-gasketed side doors and a fully gasketed back permit introduction of small and large equipment
- Optional gas purge controls automatically
 - ✓ establish a particle-free environment
 - ✓ maintain a humidity set point down to 0% RH
 - ✓ minimize system recovery time
- Arm ports accept a wide variety of gloves, including Terra's accordion sleeve and glove assembly
- Available in five materials: acrylic, static-dissipative PVC, nondissipative PVC, polypropylene and polycarbonate

Terra's Series 100 Polymer Gloveboxes provide a clean, low-humidity environment for critical processing operations in such industries as semiconductor and pharmaceutical manufacturing. Their modular design lets you select the options you need for your application.

Dual side access doors open inward to allow easy parts transfer from inside the chamber. Doors feature stainless steel reinforcement frames that increase the structural rigidity of the door by a factor of five. A built-in LiftLatch securely seals the door without applying lateral torque that could damage hinges.

How to Order:

1. Select the glovebox of the desired size (single or twin) and material from the ordering table below.
2. Select the Air Lock for your application. The Standard or Pass-Through Air Lock is for connection to one glovebox; Universal Air Lock allows connection of two gloveboxes in series. Right-side mounting is standard.
3. Read across the table to select the appropriate accessories for your system; all prices include installation. Other optional accessories are listed on the following pages.

Single Model (2 Arm Ports)

Twin Model (4 Arm Ports)

Type	A	D	F	H	I	M	N

① Complete with inlet and outlet for gas fittings and relief/bleed valve (order separately).

② Includes grounding terminals. The Stainless Steel Work Surface is required with the Static-Dissipative PVC glovebox to prevent scratching.

③ Includes 110VAC, 50/60Hz fluorescent illuminator (for 220VAC/50Hz, add "-220" to the part number).

④ Acrylic is damaged by alcohol and other cleaning agents.

Standard Air Lock

These air locks mount on the right side of the glovebox to allow easy pass-through of parts into and out of the chamber. They feature a swing-down door on the front (outside) and a second door that is easy to open by a gloved hand from inside the glovebox. One-piece nonadhesive gasket enhances sealing performance and extends service life. Capped ports are provided to allow purging of the air lock with nitrogen. Right mounting is standard.

Pass-Through Air Lock

Chrome-plated racks accommodate adjustable shelves. In-line double-door construction lets you pass small parts easily into the glovebox; you simply slide a shelf through the outside door to load parts and then through the inside door to unload them in the chamber. Order shelves separately. Right mounting is standard.

	Cat. #	\$/Each
Acrylic Shelf	1680-67	18.00
Stainless Steel Shelf	1680-68	69.00

Universal Air Lock

The Universal Air Lock features dual flanges (each with gaskets) to permit mounting on either the right or left side of any Terra plastic glovebox. They also allow multiple gloveboxes to be connected in series. Each air lock includes a capped inlet and outlet for connection to purge gas and Automatic RB® Valve. Select material compatible with your glovebox(es). Right mounting is standard.

Stainless steel frames now standard on all access doors.

④ Comes standard on polypropylene models. Models above are 110VAC/60Hz. Add "-220" to the catalog number for 220VAC/50Hz power.

⑤ Mounted horizontally on the inside rear wall, 3" from the bottom (specify other position, if desired).

Includes master on/off switch, 15-Amp circuit breaker and 4 outlets.

Series 200 Negative- Pressure Gloveboxes

See facing page for negative pressure configurations

Stainless steel door frames with unique "e" profile elastomer gasket increase structural rigidity, extend service life, improve sealing performance

- Ideal for drying, degassing, and ventilation applications
- Clear construction (of acrylic or polycarbonate) provides full visibility of work in progress
- Sturdy construction allows sustained negative pressure operation at 5" WG (29.9"Hg in vacuum antechamber)
- Vacuum safety valve included to prevent damage to walls or seals

These economical vacuum gloveboxes are designed for degassing operations, chemical mixing, biological tests, and other processes requiring sustained negative pressure. Each chamber is fabricated out of solvent-welded 1/2" transparent material that combines full visibility with light weight, cleanliness and durability. Dual glove ports allow full access to work in progress. Select acrylic for general applications, or polycarbonate for resistance to a wide range of chemicals and thermal stress. Equipped with a vacuum safety valve on a standard basis, these chambers are designed for operations with sustained negative pressures down to 5" WG (Water Gauge). Dual side access doors open inward to allow easy parts transfer from inside the chamber.

Optional Swing-Up Front Access Panel

No. 1681-15 with No. 1680-93 air lock

Optional negative-pressure air lock

How to Order:

1. Select the glovebox of the desired material (either acrylic or polycarbonate). Models are available with or without the swing-up front access panel. Note: Terra recommends selection of a stainless steel work surface to prevent scratching in all plastic chambers.
2. Read across the ordering table to select a vacuum antechamber or air lock (price includes standard right-side installation).

All dimensions in inches.

Series 300 Stainless Steel Glovebox

See Catalog 105

Page 455

- Provides a clean, controlled environment for a manufacturing processes in semiconductor, pharmaceutical, and other industries
- Transparent dissipative PVC window affords full view of processing area
- Side flanges simplify insertion/removal of process equipment and allow easy addition of ovens and air locks
- Removable arm ports can be interchanged to meet specific requirements and accept a wide variety of gloves
- Select single model (with two glove ports) or twin model (with four glove ports)

The Series 300 Stainless Steel Controlled Atmosphere Chamber provides a hermetically sealed environment for such manufacturing operations as resistance welding of semiconductor hybrids, parts degassing, temperature and humidity testing, and chemical mixing in a nonreactive environment.

Series 350 Glovebox
Same footprint as the series 300 chamber but with sloping dual-side visibility. Model shown (with right-side airlock):

	Cat. #	\$/Each
Single	9000-22A	8,371.00

Elastomer seal for superior performance

Air Lock Provides Convenient Access. Shown with optional viewing window. See page 18.

Stainless Steel Glovebox

Specifications & Ordering Information

Door Openings: 121½" x 121½" with gasketed doors supplied with air locks (see ordering information below); doors open inward.

Arm Ports: 8" round with flange for connecting glove assembly

Gas Ports: ¼" compression fittings for gas inlet and system pressure lines; compression fitting for Automatic RB® Valve. Appropriate adapter inserts are supplied for any Terra gas systems ordered.

Light: 120VAC/60Hz fluorescent.
For 220VAC/50Hz, add "-220" to the part number

Series 400

Stainless Steel Glovebox

- Provides all the features and capabilities of Terra's Series 300 models in a more spacious chamber
- Interfaces with Vacuum Antechamber for vacuum operations down to 29.9" Hg
- Optional gas purge controls automatically establish a Class 1 particle-free environment and maintain a humidity set point down to 0% RH/0.5 ppm(v) H₂O

These chambers are a larger version of the Series 300 chambers listed on the preceding pages.

In addition to all of the features of the Series 300 models, these chambers also accommodate Terra's Vacuum Antechamber, which supports vacuums down to 29.9" Hg for a wide range of operations in many industries. Their double-gasketed side flange allows easy insertion of large process equipment into the work chamber and easy mounting of the antechamber, a vacuum/nitrogen oven, or a standard air lock.

Specifications: Series 400 Glovebox

- Door Openings: 12" x 12" gasketed doors supplied with air locks
(see ordering information on facing page); doors open inward.
- Arm Ports: 8" round with flange for connecting glove assembly

Specifications: Vacuum Antechamber

- Construction: 6061 Aluminum (with brass fittings); or stainless steel (with stainless steel fittings); high-vacuum design; TIG welded structure
- Dimensions: 15" dia. x 24" long
- Tray Dimensions: 12" x 23"; extends to 14" beyond opening for loading
- Doors: Single center-clamped, O-ring sealed, counterbalanced, vertical travel; stainless steel on both models
- Vacuum Capability: 1 x 10⁻³ Torr
- Vacuum Gauge: 2 1/2" compound Bourdon tube dial type
- Connections: 1" evacuation valve, 1/4" backfill valve, 1/4" IPS plug

Stainless Steel Air Locks

Shown with optional 7"W x 9½"H tempered glass viewing window (Cat. # 1702-02, \$421)

Elastomer seal for superior performance

Optional mechanical interlocks:
Cat. # 1702-03, \$460

Terra's improved air lock design ensures a leak-proof environment that minimizes nitrogen loss and contamination inflow while parts are passed into and out of the glovebox. "Knife" edges along the doors seat against recessed polyurethane gaskets. Double-wall stainless steel construction, with heavy-duty door latches and hinges, ensures a long service life.

Select optional safety glass viewing window on the access side. Includes a ½" NPT opening for connection of purge gas and outlet to accommodate an Automatic RB® (Relief/Bleed) valve.

Ordering Information: The chart below provides ordering information for air locks installed on each Terra glovebox. Each air lock comes with a mounting flange that allows it to be retrofitted onto the specified glovebox.

Gloves & Sleeves

A. Changeable Latex Sleeve & Glove Combination

These accordion sleeves, made of neoprene, can be used for any size and type of gloves. The economy feature of these sleeves is the convenience of changing different glove sizes and types for different operators or applications without the expense of changing the sleeve itself. The corrugated section keeps the sleeve off the operator's arm for better air circulation and greater comfort. Includes natural latex gloves. Glove Thickness: 18 mil.

Glove Size	18" Sleeve	
	Cat. #	\$/Pair
8	1681-90A	255.00
9	1681-91A	256.00
10	1681-92A	257.00

B. Hypalon-Neoprene Gloves

These gloves combine the flexibility and dexterity of neoprene with Hypalon's exceptional resistance to ozone and chemicals. They thus provide an extra long service life under unusually severe conditions. Their all-white surface ensures good visibility and won't hide contamination. Weight per pair: 3.5 lbs. Size: 9. Length: 32".

	Cat. #	\$/Pair
Heavyweight (.030 in.)	1671-10	203.00

C. Butyl Sleeve and Glove Combination

Textured grip improves dexterity. Length: 32".

9	1689-09	6.00
10	1689-10	6.00

E. Neoprene Sleeve and Glove Combination

Select one-piece bonded or two-piece sleeve/glove combinations. Two-piece units provide the convenience of quick, easy glove replacement while leaving the sleeves attached to the glovebox. Sleeve and glove are joined by a Glove-Under-Sleeve (GUS) connector, which ensures an air-tight, liquid-tight seal and protection against hazardous materials. Length: 30" total (22" sleeve only, tapering to a 4"-diameter cut-off). Sleeve thickness: 0.030" - 0.040".

F. Hypalon Sleeve and Glove Combination

Select one-piece fully-dipped glove or two-piece sleeve/glove combinations. Two-piece units provide the convenience of quick, easy glove replacement while leaving the sleeves attached to the glovebox. Sleeve and glove are joined by a Glove-Over-Sleeve (GOS) connector, which ensures an air-tight, liquid-tight seal and easy glove changeout. Length: 32" total (22" sleeve only, tapering to a 4"-diameter cut-off). Sleeve thickness: 0.015".

Filtration Modules

- Ideal for analyzing, mixing and packaging toxic pharmaceuticals and other chemical powders
- HEPA or ULPA filters remove sub-micron particles from the glovebox to ensure an ultra-clean processing environment

**Series 300
Stainless Steel Glovebox
(No. 1694-04B) with:**

- Closed-Loop Filtration Module
- Air Lock
- Glove/Sleeve Combination

**Series 300
Stainless Steel Glovebox
(No. 1694-04B) with::**

- Open-loop filtration module
- Air Lock
- Hinged Viewing Window
- Glove and Sleeve Combination
- Hinged Glove Port Covers

Closed-Loop Filtration Module for Continuous Recirculation

Includes a 460-CFM impeller blower, mounted in an acrylic housing, that draws air through an inlet HEPA, ULPA or charcoal filter. HEPA and ULPA filters remove particulates, aerosols, spores and other contaminants to ensure a clean process environment. The charcoal filter removes common organic vapors. A 4-position PVC diverter valve determines the percentage of fresh make-up air entering the chamber: either 100% (no recirculation); 0% (complete recirculation); or 50% (half fresh, half recirculated). Pipes are 2"-dia. PVC (other sizes and materials available).

Open-Loop Filtration Module for Safe Indoor Exhausting

Includes a 460-CFM impeller blower, mounted in an acrylic housing, that draws air through an inlet filter into the glovebox. This filter (HEPA or ULPA) removes particulates, aerosols, spores, and other contaminants. A HEPA or ULPA filter removes contaminants from the exhaust for indoor release. Both filters are enclosed in a disposable acrylic housing for safe, easy handling and disposal.

Select HEPA or ULPA filters (2 required).

For Glovebox Type	Closed-Loop Module		Open-Loop Module

Activated Charcoal	1701-90A	233.00	—	—

* These filters are encased in an acrylic housing for safe handling and disposal.

Perfect for nitrogen-purged chambers

Internal Mount Recirculating Filtration Module Ideal for process gas environments!

This module continuously circulates process gas through a HEPA or ULPA filter to remove sub-micron particles, producing cleaner-than-Class 10 conditions inside the glovebox. Includes dual 68 CFM motorized impellers for rapid filtration cycling. Price includes installation inside specified Terra glove box. Select desired filter separately. 120VAC, 50/60 Hz (220VAC models available)

Housing	Cat. #	\$/Each

ULPA	2100-32	146.00

Process Gas Generators & Dryers

Terra's gas generators and gas dryers provide several ways to produce a dry, particle-free environment inside glove boxes, desiccators, and other enclosures.

Membrane separation systems operate with no moving parts and require almost no maintenance. The Nitrogen Generator uses this technology to provide a reliable source of clean, dry nitrogen.

Nitrogen Generators

Purity vs. Flow Rates (@100 PSI inlet feed, 72°F*)

Model	99%	98%	97%
No. 2700-12A	7.4 CFH	10.2 CFH	12.5 CFH
No. 2700-11A	49.0 CFH	65.0 CFH	75.0 CFH
No. 2700-09A	126.0 CFH	180.0 CFH	223.0 CFH

* Higher flow rates can be achieved with higher feed temperature (see Terra's process gas heater, No. 9450-00).

A Nitrogen Generator

Comparative Guide to Terra Gas Dryers

Product	Design Type	Outlet Flow Capacity	Service Requirement	Prefilters Included	Overall Dimensions (W x D x H inches)	Recommended Application	Cat. #	\$/Each

E. DryCycler™ Regenerating Gas Dryer

Quickly provides an ultra-low humidity level (down to 1 ppm of water vapor) inside a glovebox or other enclosure. A humidity controller activates the dehydration module (dual molecular sieves and catalytic converter) to maintain humidity set point. A regeneration module automatically reactivates the system. Dual HEPA filters ensure a particle-free air flow of about 300 CFH.

Cat. # \$/Each

6706-01 14,344.00

F. Automatic RB® (Relief/Bleed) Valve

Automatically relieves pressure build-ups to ensure safe operating conditions with Terra's gas control systems.

For Stainless Steel Enclosures

Economizes on nitrogen consumption up to 78%

Extends shelf lives of stored materials by controlling moisture and moisture-related defects

DewWatch™: Humidity Monitor & Control
(Dual Purge System, RB valve required)

Typical application with NitroWatch/DualPurge humidity controllers (not included)

Heating & Cooling Modules

A. Process Gas Heater

Terra Universal's Process Gas Heater raises the temperature of the process gas up to 350°F (see performance graphs). The thermostatic control ensures temperature stability. Its isolated heating system provides controlled heating without direct contact with the process gas—guaranteeing safe, noncontaminating operation with potentially explosive gases. The “smart” programmable temperature controller monitors and responds to gas temperature measured at the outlet, continuously adjusting the temperature profile and guarding against temperature overshoot.

	Cat. #	\$/Each
120VAC/60Hz	4320-00	2,434.00
220VAC/50Hz	4320-00-220	2,434.00

B. Process Gas Cooler

The Process Gas Cooler adds cooling capability to Terra's line of environmental control devices. It incorporates a high-efficiency refrigeration unit that provides effective flow-through cooling down to 30°F. This low-temperature capability is especially important in chambers that include heat-generating equipment that disrupts a stable processing temperature.

	Cat. #	\$/Each
120VAC/60Hz	9450-00	2,707.00
220VAC/50Hz	9450-00-220	2,707.00

C. High-Volume Gas Cooler (not shown)

This process gas cooler is designed to cool a flow of up to 500 SCFH of nitrogen, argon or other dry process gas down to 0°F. It includes a pressure and temperature monitor and Ethernet connection to allow remote monitoring. The explosion-proof design uses clean materials for non-contaminating operation, including an all-stainless steel gas path.

	Cat. #	\$/Each
110VAC, 50/60Hz	9450-02	6,896.00

D. Refrigeration Module

This integrated, closed-loop refrigeration system consists of a 1/4 HP compressor/condenser unit, mounted inside a stainless steel housing; and an evaporator cooler, mounted inside the glovebox. The system operates with R134 coolant, an environmentally safe, CFC-free material. An RTD sensor provides feedback to the temperature controller, which provides continuous temperature display and includes overtemperature protection and an internal bypass to prevent temperature overshoot.

Rating: 1050 BTU @ 15°F temp. differential
Control: Microprocessor-based single-point controller

	Cat. #	\$/Each
110VAC, 50/60Hz	1694-68	4,857.00
220VAC, 50/60Hz	1694-68-220	4,857.00

Note: Illustrations depict typical applications with NitroWatch/Dual Purge controllers (order separately, pg. 23).

Double-Wall, Insulated Chamber Boosts Thermal Efficiency!

If your application calls for heating or cooling, Terra will modify any standard glovebox to produce a more thermally efficient enclosure.

In most cases, these modifications include a double-wall design with 2" to 4" of polyurethane insulation, depending on the process temperature.

Call Terra to discuss your particular requirements!

Model shown:
Cat. # 1695-03
See page 2

Humex™

Humidifiers

Terra's Humex™ Humidification Modules allow controlled moisture testing in a glovebox or other chamber. The Humex™ incorporates a water reservoir for high-volume applications. The Humex 2™ humidifies the nitrogen or other process gas being fed into the chamber. It is plumbed to a standard water line and includes a vaporization chamber that provides 15 – 30 CFH flow rate. Both require a humidity sensor for automated humidity control with $\pm 3\%$ accuracy. Visit TerraUniversal.com for full specifications.

	Cat. #	\$/Each
Humex™ (110VAC, 50/60Hz)	9081-00	3,885.00
Humex 2™ (110VAC, 50/60Hz)	9081-02	2,248.00
Humidity Sensor (installed)	9500-02A	490.00

Trace Oxygen Analyzer

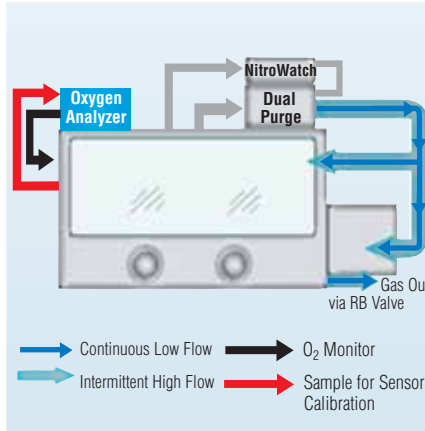

This Trace Oxygen Analyzer utilizes precise Zirconia Oxide diffusion sensors to accurately detect oxygen concentrations, making it ideal for applications in which even minute concentrations of oxygen can degrade parts. With a user-friendly, menu-driven microprocessor and a quick response time, this Oxygen Analyzer is capable of measuring from 0.01ppm to 100% oxygen with a high degree of accuracy. An RS232 interface is included.

The control housing contains: the electronics module, the sensor, the sample cell, and a high-purity pump that draws gas from the glovebox for analysis. It includes a high-visibility LED digital display that indicates oxygen concentration.

Sensor:	Quick response zirconia oxide diffusion sensor	
Measurement Range:	Autoranging from 0.01 ppm to 100%	
Accuracy:	1% or better of measured value in ppm	
Repeatability:	0.2% of measured value	
Response Time:	90% of step change within 5 seconds	
Power:	User selectable 110/220 VAC, 50/60 Hz	

Includes connection to specified glovebox.

	Cat. #	\$/Each
Trace Oxygen Analyzer	2005-97	6,953.00

Static Control

A. Ionizing Blow-off Gun

This gun emits a stream of ions to safely neutralize surfaces with pinpoint accuracy. It also helps remove surface contaminants by eliminating static attraction. Designed for use with either filtered air or nitrogen at 12-30 psi. Includes 0.4-micron filter and transformer.

	Cat. #	\$/Each
Ionizing Blow-off Gun	110VAC	2005-55 689.00
	220VAC	2005-55-220 689.00
Capsule Filters (Replacement)		
0.04µm retention	2005-52	156.00
0.40µm retention	2005-53	107.00

B. 4-Outlet Power Strip (not shown)

Includes master on/off switch and resettable 15-amp circuit breaker. Installed along rear wall of glovebox.

	Cat. #	\$/Each
120VAC, 50/60 Hz	2004-31	110.00

C. Ionizing Bar

Provides safe, effective static neutralization inside a glovebox or similar enclosure. Designed for overhead chamber mounting, it generates a balanced stream of positive and negative ions to neutralize surface static charges, safeguarding ESD-sensitive materials. The replaceable, machined titanium emitter points are long lasting and field-replaceable. Power: 120/240VAC (specify desired 24VAC output transformer).

IonBar™ (prices include installation)

Bar Length	IonBar™ for Laminar Flow Enclosures (1)		IonBar™ for Gloveboxes (2)			
			110VAC		220VAC	
	Cat. #	\$/Each	Cat. #	\$/Each	Cat. #	\$/Each

(1) Requires laminar flow for effective ion distribution. Recommended for Terra Modular Cleanrooms and Laminar Flow Stations.

(2) Price includes installation inside specified enclosure; fans ensure uniform ion distribution.

Vacuum Chambers

A – D Full-Vacuum Chambers

See specifications/ordering chart below.

A. High-Capacity Chamber (see chart below)

Ideal for degassing large assemblies. Powder-coated steel chamber with 1"-thick aluminum door. Includes 1"-thick polycarbonate viewing window, piping, fittings and solenoid valve for convenient control (order pump and vacuum controller separately). 18"W x 48"L stainless steel shelf creates a convenient platform 4.5" above chamber floor.

Powder-Coated Steel Stand Cat. # \$/Each
Raises chamber shelf to 34.6" above floor level **3404-04 1,078.00**

B. Stainless Steel Chamber (see chart below)

Double-wall construction; includes 8" x 8" tempered glass viewing window and dual metering valves and 0-30" vacuum gauge.

C. Aluminum Chamber (see chart below)

1"-thick walls; includes dual metering valves and 0-30" Hg vacuum gauge.

Powder-Coated Steel Stand Cat. # \$/Each
Raises chamber 17"; includes casters. **1590-61 541.00**

D. Full-View Acrylic Chamber (see chart below)

Made of 1/2"-thick acrylic. Designed for continuous pump operation with safety relief valve.

E – J Low-Vacuum Chambers

See specifications/ordering chart below.

Ideal for degassing and transporting small parts. Designed for continuous pump operation with safety relief valve (order below).

Low-Vacuum Chamber Accessories

Metering Valves Cat. # \$/Each
5235-09 120.00

Two required for direct connection to pump, or one if connecting to Lo-Vac Controller (which includes vacuum bleed valve). See chart below.

Vacuum Gauge **5235-10 96.00**

Required if selected pump does not include metering kit.

Safety Relief Valve

Required on all low-vacuum chambers to prevent damage.

For vacuum to 6" Hg **5235-11 86.00**

For vacuum to 12" Hg **5235-14 84.00**

Call for custom modifications

Model shown: ref. 3404-05 modified for nitrogen backfill and thermocouple output.

* Includes all connections, vacuum solenoid, turnkey installation and testing charges.
For 220VAC, 50Hz models, add "-220" to the affected part number.

Vacuum Controller

Recommended for all continuous vacuum applications. For Full Vacuum (to 29.9" Hg). Select appropriate Turnkey Connection Kit above.

Complete line of pumps at

TerraUniversal.com

Temperature Stability Chamber

- Provides a particle-free, heated environment for biocompatibility testing, sensor calibration and other critical operations
- Segmented access shields afford easy access to large working area
- Maintains stable temperature ($\pm 0.5^{\circ}\text{C}$ between $18 - 25^{\circ}\text{C}$) even with access shield partly open

This enclosure maintains extremely stable temperature conditions (21°C , $\pm 0.5^{\circ}\text{C}$) even when the external temperature fluctuates as much as $\pm 20^{\circ}\text{C}$ and the access shield is partially open.

Its large working area (up to $120''\text{W} \times 54''\text{D} \times 36''\text{H}$) is divided into $40''\text{W}$ zones, each with independent access shield and temperature controls. Air flows vertically through 99.99% efficient HEPA filters to provide a continuous wash of laminar-flow air that creates a cleaner-than-Class 100 work environment. Air passes through perforations in the work surface and passes through a 10,000 BTU air conditioning module and then through zone heaters that bring it up to a constant temperature before it circulates through HEPA filters and re-enters the work area.

The system disassembles for convenient shipping and installation in facilities with restricted access. Front access shield cut-outs can be specified for glove ports.

Overall Dimensions	Chamber Size (ID)	40"W Access Zones	Cat. #	\$/Each
40"W x 64"D x 81"H	40"W x 54"D x 36"H	1	1695-23	8,500.00
80"W x 64"D x 81"H	80"W x 54"D x 36"H	2	1695-24	16,287.00
120"W x 64"D x 81"H	120"W x 54"D x 36"H	3	1695-25	23,360.00

* Order desired Fan/Filter Unit (HEPA or ULPA) separately - one 2' x 4' unit required per access panel.

Vertical Laminar Flow Station

Fluorescent light standard; UV sterilization bulbs available

Digital Control Panel
• Filter/Fan Unit
• Light
• Backpressure alarm
• Motorized Shield*

Side Panels ensure effective laminar flow

Work Surfaces* available in many sizes and materials.

Two-piece design isolates FFU vibration.

*System option

This economical system provides a laminar flow of HEPA-filtered air to meet the most critical contamination requirements. It incorporates industry-leading 48 dBA blowers for quiet, low-vibration operation. The all-304 stainless steel or powder-coated steel is cleanroom compatible and easy to clean and sterilize. An optional motorized front shield extends 3" – 25" above the work area for more effective particle control. Fluorescent lighting is included; for complete line of options, visit TerraUniversal.com.

Motorized Sliding Shield* extends 3"–25" below hood to restrict access to work area and improve system efficiency. Rated for millions of operations!

Modular Cleanroom Drawers*—select stainless steel or plastic

Horizontal Laminar Flow Station

See Catalog 105

Page 410

- The ideal processing environment for contamination-sensitive materials
- Dual multi-speed filter/blower modules direct a continuous wash of HEPA- or ULPA-filtered air forward across the work area
- Take-up ducts along front and side edges minimize turbulence and backwash in the work area
- Face velocity is adjustable from less than 90 FPM to higher than 130 FPM
- Built-in recessed illuminator provides diffused lighting without interfering with laminar flow
- Electropolishing available to remove embedded subsurface particles in stainless steel surfaces
- Fluorescent lighting standard, UV sterilization lamps available

Model shown: No. 9620-44
For complete specifications: TerraUniversal.com

Return air ducts minimize turbulence and backwash

Terra's Horizontal Laminar Flow Station provides an economical work environment that exceeds the most stringent contamination requirements in the pharmaceuticals, biotech, electronics and semiconductor industries.

Powerful filter/blower modules provide a back-to-front laminar flow of filtered air across the work surface. The adjustable multi-speed, direct-drive blowers let you adjust air speed (90-130 feet per minute) to meet your requirements while providing low noise and vibration levels.

For enhanced air-stream control, this station also features return ducts along the front and side edges of the work area. These ducts enhance system efficiency by reducing backwash, the most common source of turbulence in a laminar flow system.

CleanBooth™ Laminar Flow Station

Terra's Portable CleanBooth™ is ideal for kitting operations, assembly, or work with probe stations, screen printers and other free-standing or benchtop process equipment. The backbone of the system is one or more filter/fan units (FFUs), each with industry-leading low-noise impeller blowers. Flexible side curtains create a 3-sided enclosure, enhancing the laminar flow. See other options below.

Mobile Frame Support

Includes set of 4 casters, 2 with locking brakes. Order FFUs below.

Benchtop

Laminar Flow Hoods

Terra offers several bench-top systems to meet a variety of application requirements. Please visit TerraUniversal.com for complete operating specifications and pricing on dozens of standard configurations.

A. Universal Hood

Completely modular design lets you configure an economical clean bench to your requirements, in acrylic, polypropylene, dissipative PVC or stainless steel. Single and twin hoods available. Options include two-piece stand that isolates blower vibration — perfect for high-magnification work.

System shown: acrylic hood No. 1715-10A (\$925), with blower-filter module No. 1715-51 (\$757). Includes swing-vane anemometer to monitor air speed. Select HEPA or ULPA filter.

A

B. CleanCube™ Seamless Laminar Flow Hood

Terra's CleanCube™ provides a vertical laminar flow of filtered air to create a particle-free environment. Its one-piece hood design eliminates cracks and crevasses where germs or particles can collect. The coved corners are easy to wipe down, and the absence of corner support members ensures a full view of work in progress. It also eliminates the cramped, claustrophobic feeling that operators experience when working with a hood. Fan/Filter Unit (FFU) provides 310 CFM average flow of HEPA-filtered air at 260 ft./minute. Includes swing-up access shield.

System shown: 24"W x 24"D x 28"H acrylic hood No. 2003-10A (\$1,562) with HEPA fan/filter unit No. 6702-10A (\$765). Polycarbonate also available, along with 36"-wide models.

*Rounded corners
for easy cleaning,
full visibility*

B

C. WhisperFlow™ Bench-top Hood

This versatile system offers industry-leading low noise and vibration (48dBA) in either a horizontal or vertical flow configuration. It consists of two modules: a fan/filter unit (FFU), which houses a HEPA or ULPA particle filter, and a hood. Models are available in 36" and 48" widths.

C

Free-Standing Exhaust Fume Hoods

This Exhaust Fume Hood is designed to afford you maximum economy and flexibility in designing the system that's right for your application.

The frame is fabricated from welded 1½" x 3" powder-coated or 304 stainless steel to ensure sturdy support for the exhaust fume hood. The frame also isolates the hood (and any vibrations the hood causes) from the work surface. A 6" round discharge allows easy connection to your in-house exhaust system to provide the internal negative pressure necessary to safely remove fumes from the work surface.

The front of the unit features an easy-glide sliding shield (also made of transparent PVC mounted in a powder-coated aluminum frame). The Ductless Exhaust Purification Hoods include an explosion-proof blower installed inside the hood and provisions for mounting purification filters and particle filters that safely remove a wide array of fumes to allow safe indoor release of exhaust.

Shown with optional Cleanroom Bench.
(See Catalog 105, page 415 for complete information).

* Supporting frame is made of powder-coated steel tubing; stainless steel frame is available on a custom basis.

** Order Purification Filters separately. These systems include a ¾ HP explosion-proof blower mounted for negative-pressure venting.

Horizontal Exhaust Fume Hood

Model shown: acrylic hood No. 1682-87B with HEPA filter/blower module No. 1650-31. System dimensions: 42"W x 43.5"D (hood and blower) x 28"H

Vertical Exhaust Fume Hood

Model shown: acrylic hood No. 1683-29B with HEPA filter/blower module No. 1650-41. System dimensions: 42"W x 30"D x 41.5"H (hood and blower)

ECM™ Modular System:

Ductless Exhaust Purifiers

These horizontal or vertical flow systems ventilate and purify fumes generated by such operations as soldering, chemical mixing and pharmaceutical packaging, allowing safe indoor release of exhaust.

Hoods are available in five materials, including stainless steel and dissipative plastic, in sizes from 28" to 56" wide. Options include fluorescent lighting, air flow meters, and work surfaces, see TerraUniversal.com for details.

High-Clearance Chemical Fume Hood

This benchtop unit features over 28" of vertical clearance with the access shield open. The dual impeller blowers provide ample ventilation under filter load to maintain exhaust air speed ≥ 100 fpm for safe operation and worker protection. A polypropylene tray collects chemical spills, and quick-release clamps ensure easy access to activated charcoal and/or final HEPA filters. The sloped front access provides full view of and access to work in progress. Overall dimensions: 32.5"W x 25"D x 33.25"H (48"H with filter/blower module). Access shield clearance: 15.5" (closed); 28.25" (open).

Exhaust Flow: 400 CFM (with charcoal filter)
350 CFM (charcoal and HEPA final filter)

Critical Environment Solutions **Product Showcase**

“Squaroid” Vacuum Ovens

These ovens provide a max. temperature of 220°C. Radiant warm-wall heating provides more even chamber temperature, and built-in high-limit thermostat guards against overheating. Models below feature LED temperature readouts and operate at 120VAC; 240VAC and dial thermometer models are also available, as well as high-temperature models.

Chamber Volume	With LED Readout	
	Cat. #	\$/Each
0.7 cu. ft.	3700-80	2,560.00
2.3 cu. ft.	3700-82	4,412.00

Hi-Temp “Squaroid” Oven

Includes hydraulic thermostat controls for heating up to 300°C. Radiant warm-wall heating provides uniform temperatures and eliminates the hazards of open-wire heaters. Externally isolated heaters maximize safety and chamber space. Top-mounted operation panel controls vacuum to nearly 30" Hg. Chamber interior is stainless steel. Models below are 120VAC; 240 VAC models also available.

Chamber Size	Cat. #	\$/Each
1.1 cu. ft.	3700-39	5,312.00
1.7 cu. ft.	3700-41	5,548.00

Class 100 Cleanroom Oven

Four-segment programmable controller provides precise heating to 250°C. Models below include HEPA filters that make them compatible for use in Class 100 (ISO 5) cleanrooms (models also available without HEPA filters for less stringent requirements). Interior walls are stainless steel, with stainless steel bottom and sidewall plenums. Delrin hinge pivots eliminate metal-on-metal surfaces. Model below is 120VAC; 240 VAC models also available. Includes 2"-dia. exhaust vent, .125" NPT fitting for introducing inert gas or house air, and four adjustable stainless steel shelves. Chamber size: 2.8 cu. ft.

Cat. #	\$/Each
3700-70	9,040.00

High-Capacity, HEPA-Filtered Cleanroom Oven

This oven provides a stable elevated temperature (60°C, $\pm 2^\circ\text{C}$) for a very large stainless steel chamber: 36"W x 36"D x 90"H (67.5 cu. ft.). Air or process gas is forced through dual HEPA filters located above the ceiling of the process chamber; continuous recirculation ensures temperature uniformity and a better-than Class 100 (ISO 5) process environment. Includes temperature uniformity certification based on 9-point temperature mapping. Overall dimensions: 43.5"W x 42"D x 107"H.

No. 3700-85 (14 cu. ft.)

Large-Capacity Forced-Air Ovens

PID temperature controls provide stable heating to 220°C, and a unique turbo blower system creates true one-pass circulation pattern for optimal uniformity and fast recovery time. Includes an electronic digital timer with large LED display and overtemperature protection and isolated heating elements. Chamber interior is stainless steel. Models below are 120VAC.

Chamber Size	Cat. #	\$/Each
14.0 cu. ft.	3700-85	4,626.00
28.0 cu. ft.	3700-86	5,743.00

Tube Furnaces

Ideal for growing electronic crystals, doping silicon wafers and many other microelectronics applications. Features temperature range from 100°C to 1200°C. Two interchangeable vestibule ends (1" and 2" dia.) accommodate tubes up to 2" in diameter. Chamber operates remotely or in horizontal, angular or vertical positions. Models below are 120VAC; select manual or single setpoint control. Length: 12".

Control Type	Temp. Range	Cat. #	\$/Each
Manual	370°C to 1100°C	4000-69	1,599.00
Single Setpoint	100°C to 1200°C	4001-86	1,965.00

Environmental Chambers

These microprocessor-controlled chambers provide precise control over environmental conditions for repeatable results in material testing, component burn-in, shelf-life monitoring, and other critical studies. **Refrigerated Incubators** provide precise temperature control from 5°C to 60°C. **Stability Chambers** add a relative humidity system with solid-state humidity sensor and controller that allow humidification and dehumidification for operation from 20 to 98%RH. All incorporate environmentally friendly HFC refrigerant and CFC-free insulation. Light packages and chart recorders are optional. Models below are 115VAC; 230VAC also available

Benchtop Muffle Furnaces

These muffle furnaces offer a heating range from 100°C to 1200°C and two chamber sizes. A ceramic shelf (standard for 350 cu. in. chambers) effectively doubles the working area. Open-coil heating elements on both sides of the chamber and high thermal-efficient ceramic insulation provide temperature uniformity and heating efficiency. A built-in venting system removes contamination and moisture. Models below are 120VAC; 240 VAC models also available.

Control Type	Chamber Size	Cat. #	\$/Each

Prog. 8 ramp/8 dwell	350 cu. in.	4001-84	3,334.00

RH/Temperature Stability Chamber

This stainless steel cabinet is configured for storage of polycarbonate films used for high-precision screening of circuit boards. It maintains critical relative humidity and temperature levels to prevent dimensional aberrations that result from exposure to humidity and temperature fluctuations.

Air circulates horizontally across the shelves that hold the film. As air exits the storage area, it passes through an air conditioning/heating module that conditions it to within $\pm 2^\circ\text{F}$ of the temperature set point. In addition, the continuously operating A/C module removes moisture to keep the %RH level within $\pm 3\%$ of the set point. If humidity falls too low, an ultrasonic humidifier cycles on to add the proper amount of water vapor. If the temperature falls too low, the heater module cycles on. A water filtration system removes contaminants from the humidification feed water to eliminate the chance of mineral deposits or other vapor-borne contaminants.

As the process air exits the RH/temperature modules, an impeller blower draws it into an intake plenum area and forces it uniformly back through the storage area.

Compact Low-Cost Lab-Line Incubators

These compact and low-cost Lab-Line incubators are perfect for small or crowded workspaces and provide the added benefit of rugged construction and a choice of metal or acrylic door construction. The aluminum chamber and rugged metal door with positive latch provide excellent temperature uniformity, while the acrylic door model permits unobstructed sample views and eliminates temperature variations from opening and closing the door. A bimetallic thermostat controls heat uniformity.

1.0 Cubic-Foot Capacity	Cat. #	\$/Each

Imperial III Incubators from Lab-Line

These durable gravity convection and mechanical incubators allow for years of dependable use due to their durable heating elements, and they come in three chamber capacities (see TerraUniversal.com). A tempered glass inner door on all models allows samples to be inspected without disturbing the chamber environment. Electrical outlets are provided internally to allow for the safe operation of shakers, stirrers and rotators. 220VAC models also available.

(See TerraUniversal.com for additional models)

SterileMax Steam Sterilizer from Barnstead

At 1.2 cubic feet and 12-by-18 inches, the SterileMax chamber is the largest of any portable bench-top model and accommodates three 2-liter Erlenmeyer flasks. The triple door lock guarantees a secure operation, while operators can take advantage of four preset one-touch programs for liquids and hard goods. Visit TerraUniversal.com for options such as a non-recirculating feature that ensures debris and contaminants are not recycled. 220VAC available.

Water Pre-Treatment and Biological/Temperature Indicators

Terra Universal offers the DI+ Water Pretreatment System to provide up to four liters of pure water per minute, and it's economical at 23 cents per gallon.

Terra's biological indicators verify the sterility of your instruments, vials, media, liquid cycles and other products. Our Chemitest See-Thru Pouches, coming in six sizes with self-sealing edges, are used for steam, ethylene oxide and chemical vapor sterilization. Our temperature indicators assure that items being processed have been run through a complete cycle, preventing the accidental use of items that have not been processed. All these necessary items can be found along with the sterilizers at TerraUniversal.com.

Ceramic tops also available in 3 sizes

Cimarec® Digital Aluminum Hot Plates and Stirrers

Rugged aluminum surfaces provide uniform heat distribution and durability. Microprocessor-controlled feedback maintains consistent, repeatable temperature settings. The easy-to-read display indicates temperature settings, adjustable in increments of 5°C up to 300°C. StirTrac™ technology offers improved slow-speed stirring, consistent speed control, and stronger magnetic coupling. All models below are 120V with 7" x 7" tops; other models available, including ceramic tops in several sizes.

	Cat. #	\$/Each
Hot Plate	4100-03	259.00
Stirring Hot Plate	4100-04	424.00

UV Sterilization/Filtration Cabinet

This polypropylene cabinet features a ceiling filter that removes submicron particles, including bacteria, aerosols and other biohazards. Perforated shelves optimize the vertical flow of clean air through the cabinet; air exits through exhaust slots on the amber acrylic doors. Each of four chambers features a 254nm UV fluorescent germicidal light with timer. 25.75"W x 13.5"D x 56"H (including filter/blower module). Other sizes and chamber configurations available.

	Cat. #	\$/Each
Sterilization Cabinet	6081-05	3,533.00
HEPA Filter (99.99% efficient @ 0.3µm)	2100-30	106.00

Lab Refrigerator/Freezers

These units come in 2 configurations. A 17.9 cubic-ft. two-door refrigerator/freezer features hydraulic thermostatic control and separate "cold air flow" control for the freezer. It includes 2 adjustable shelves and automatic defrost. A 20 cubic-ft. upright freezer features 4 fixed wire shelves and 6 door shelves and comes with manual defrost. Temperature range: 0° to 10°C (refrigerator compartment); -20°C to 0°C (freezer compartment). Models below are 120VAC; 240VAC and explosion-proof models available.

	Cat. #	\$/Each
Freezer	1720-60	1,694.00
Combination	1720-49	1,570.00

Explosion-Proof Hot Plate

This corrosion-resistant, easy-to-clean unit is specifically designed to ensure safe heating in potentially explosive situations! The cast-aluminum top plate provides effective heat transfer, and all controls are contained in an aluminum housing, protected from the explosive atmosphere. Heating surface: 6" x 6". Temperature range: to 220°C (428°F).

	Cat. #	\$/Each
Hot Plate	4000-92	735.00

Undercounter Refrigerator/Freezers

These 5.6 cubic ft. undercounter units come in 3 configurations: refrigerators with 3 adjustable wire shelves and adjustable hydraulic thermostat control; freezers with 2 fixed shelves, 3 door shelves and hydraulic thermostat; and refrigerator/freezer combinations with 3 adjustable wire shelves, 3 door shelves, and adjustable thermostatic control. Models below are 120VAC; 240VAC and explosion-proof models available.

AVC Chamber Vacuum Sealer

Cleanroom compatible, the AVC series of chamber vacuum sealers is compressed-air driven, eliminating noise, vibration and heat-generation issues. Unlike electromechanically driven vacuum sealers, the AVC design prevents particle generation and oil contamination. The AVC is ideal for tray, tape and reeled products, as well as popular

shipping tubes. The AVC has a seal length of 20" and a width of 1/4". A gas flush system is optional. The AVC is a workhorse with a large chamber, one-button touch setting and preset vacuum controls.

AV Vacuum Sealer With Gas Purge

The foot-pedal-activated, retractable nozzle AV series vacuum sealers offer gas-flush vacuum packaging at its finest. The .25"-wide sealing element delivers a leak-proof seal for electronic devices that require moisture barrier bags.

With one touch of the pedal, the AV flushes out oxygen and moisture with nitrogen, and your sensitive components are sealed in seconds. Also great for dry packaging applications and shipping containers. Compressed air required.
